Subject: Water Intake

Greg
I hope this finds you doing well.

I wanted you to be aware of the letter I sent today to Steve Garrett in the state's office of Division of Emergency Management. Steve contacted us approximately 10 days ago requesting our signature, or our explanation for a non-signature, on the MT-2 form of the CLOMR as they were doing their final technical reviews. We had previously stated to Mr. Garrett that we were not signing the form as the project was in another political jurisdiction and we had no permitting responsibilities for the project. Following Mr. Garrett's recent request, our Board met and considered the request as well as information you provided to me regarding the access road into the property of the Water Intake project. Our attorney was requested to review any easements obtained by Boone. As a result of that information and considerable discussion between the attorney and the Commissioners, I was directed to submit the attached letter and copy our state representatives. Please let me know if you have questions.

Steve Garrett
Letter re Intake...

Greg

Are you still available Monday afternoon to meet? Perhaps I could explain our position more clearly at that time. I could come over at 3:30 or 4:00.

Dr. Mitchell,

The Cooper family submitted the most current plan of the road, and our engineers are working on responses to your staff's questions. At this time, the rights-of-ways on Brownwood Road are still in the early stage of acquisition. As far as your remaining questions go, I'm unable to provide any definite responses at this time other than reiterating that the Town of Boone does not own any real property or any property interest in Ashe County, and would not attempt to acquire one without the Ashe County Commission's approval. I'm not sure that meeting will be beneficial to you as I don't think I would be at liberty to provide the information you're seeking. Is the county reconsidering their position on this matter? I don't understand why you're asking these questions now.

Greg

Greg

The Commissioners would like to make sure that I have the most current map/plans of the road and the transmission lines for the water. Also they would like to gain an understanding of the path up Brownwood and why all the controversy regarding right-of-way. Additionally, they would like to gain an understanding as to any easements - or why a jurisdiction would risk a part of a project across land and not have an easement to control it in the future. If there is any kind of easement for the road, utilities, or water lines then our understanding of the law is that you need our permission. If there is not they would like to understand why not. They are trying to answer questions for their constituents as they do not think they have been given full information up to this point. I can plan

3:30 or 4:00 on the 29th if that works for you. Thanks for the response.

Dr. Mitchell, I can meet late afternoon on the 29th. What specifically do you want to discuss regarding the intake, since providing me the letter concerning the position of Ashe County.
Greg
